

## *Vacuum Dehydrator Units - Economical and Efficient*

- GFPS units are "Economical and Efficient." The units can remove solid contaminants, water (free, emulsified, dissolved), and gases.
- Water Removal of less than 100 ppm.
- Units ranging from flow rates of 5, 10, 15, 20, 30, 50 gallons per minute.
- Optional equipment packages: Particle counters, moisture sensors, and variable frequency drives.
- Standard and Explosion Proof units available.
- Oil Types: Phosphate Ester, Mineral and Synthetic, Lube Oils

### Standard and Optional Equipment

- Particle and Water Analysis Electronics
- Compact Design
- PLC or Manual Controls
- Easy Operation
- Various Power Options
- High Efficiency Filtration
- Industry 4.0 for monitoring and control over the internet.

### Applications

- Bulk Tanks
- Hydraulic Power Units
- Mining
- Oil and Gas
- Plastic Injection Molding
- Turbines
- Refineries & Petro-Chemical
- Steel Mills
- Pulp and Paper
- Heavy Machinery
- Hydraulic Presses
- And More!!!
